

KGS HYBRID®

**FLOOR POLISHING
HAND MACHINES**

KGS Hybrid® Floor Technology

The KGS Hybrid® floor technology is designed for floor edging with hand machines. This technology is the most versatile giving exceptional results wet and dry. It is working well on most natural stone and agglomerate floor materials including dry polishing of terrazzo, as well as other light colored surfaces, where its neutral color minimizes any possibility of color transfer or staining.

MACHINES

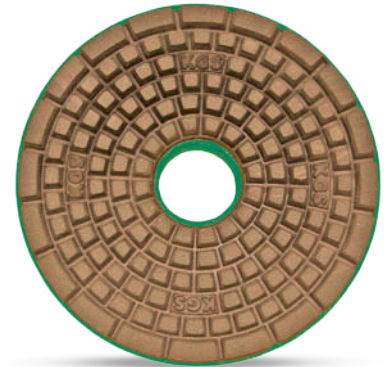

Angle grinder; best results are achieved at 3,000-4,000 rpm.

WORKABLE MATERIALS

Most natural stone and agglomerate floor materials, including terrazzo

KEY BENEFITS

- Exceptional results wet and dry
- Floor edging with hand machines
- Minimizes any possibility of color transfer or staining

PRODUCT INFORMATION

Bond: Resin bonded diamond

Diamond height: 2,5 mm

Backing: Velcro® (QRS)

Dimension: 125 mm
